

The ***Kent Environmental Summit*** and the ***Kent Memorial Library*** hosted a film series that highlighted key issues surrounding the environment.

- January 14 “**Kilowatt Ours**” focuses on how everyone can help find solutions to the energy problems of our day.
- January 21 “**Garbage Warrior**” tells the story of a maverick US architect and his fight to introduce radically sustainable housing. (Please note, there is some adult language)
- January 28 “**Who Killed the Electric Car**” investigates the birth and death of the electric car, as well as renewable energy and sustainable living in the future.
- February 4 “**No Impact Man**” in which a Manhattan family tries to live their lives with no net impact on the environment – no air conditioning, no TV, no electricity, etc.
